2016 – 2017

ANNUAL CENSUS OF POST-M.D. TRAINEES

Acknowledgements

Welcome to the CAPER Annual Census of Post-M.D. Trainees. Today's postgraduate medical residents are completing the final stage of their initial medical training. Soon they will serve our communities as family physicians, surgeons, pediatricians, internists, anesthesiologists, pathologists, and the many other medical specialists who care for Canadians. The CAPER Annual Census report is Canada's definitive source of information on the numbers and types of physicians being trained to meet our societal needs.

The Annual Census report is made possible through a longstanding partnership between governments, faculties of medicine and professional medical organizations. Guidance and financial support are provided by the Association of Faculties of Medicine of Canada, Canadian Medical Association, College of Family Physicians of Canada, Medical Council of Canada, Resident Doctors of Canada, Royal College of Physicians and Surgeons of Canada and federal/provincial/territorial governments. CAPER is sincerely grateful for the stewardship and financial support of its contributing members.

Many individuals also need to be thanked for the time and effort they give to CAPER especially the members of the CAPER Committee and Advisory Group who provide guidance through their participation in annual meetings.

A sincere thank you is extended to CAPER data providers within the faculties of medicine. Associate Deans, Managers and other staff in Canada's postgraduate medical education offices submit and verify data files for use by CAPER. The Ontario Physician Human Resources Data Centre performs this work for all Ontario faculties of medicine. The time and effort given by data providers forms the cornerstone of the CAPER database.

A special thank you goes to CAPER Senior Data Analyst, Mr. Leslie Forward, for working to a very high standard preparing the Annual Census report and its supplementary reports.

On behalf of CAPER, it is a pleasure working for our participating members and clients in managing this unique national resource.

Background

CAPER (the Canadian Post-M.D. Education Registry) was established in 1986 through the co-operation of national medical organizations with an interest in the post-M.D. clinical education of physicians in Canada. The Association of Faculties of Medicine of Canada, Resident Doctors of Canada, the Canadian Medical Association, the College of Family Physicians of Canada, the Royal College of Physicians and Surgeons of Canada, the Medical Council of Canada, Health Canada, and the provincial and territorial ministries of Health have provided both expertise and financial support for the development and operation of CAPER.

CAPER is incorporated within the by-laws of the Association of Faculties of Medicine of Canada with the mandate to provide accurate information which may be used for physician resource planning on a national basis. To accomplish this task, a longitudinal file is maintained containing socio-demographic information and details of the current and past training programs of each resident or fellow under the supervision of the Canadian Faculties of Medicine on November 1 of each year as submitted by the office of Postgraduate Medical Education at each of the Canadian Faculties of Medicine.

The Reporting Process

The individual records of all trainees under the supervision of each Canadian faculty of medicine are provided to CAPER by the postgraduate medical education office of the respective faculty. All post-M.D. trainees (residents and fellows) in training positions on November 1 of the current academic year are reported to CAPER. The following information is included in the yearly report:

- the faculty of medicine supervising post-M.D. training
- socio-demographic information
- previous medical education and certification, and
- field of current post-M.D. training

This information is collected by all faculties at the time of registration for post-M.D. training each year and is sent to CAPER, in coded form. Information sent to CAPER is checked for missing or incorrect items. Reports are then sent back to the appropriate postgraduate medical education office of the Canadian faculties of medicine for further verification of the information on their trainees.

Data Privacy

At the Canadian Post-M.D. Education Registry (CAPER), we take physician privacy very seriously. It is a long-established policy of CAPER and the Association of Faculties of Medicine of Canada (AFMC), of which Association CAPER is a component division, to deal with all physician information in a sensitive manner, in order to ensure that our collections, uses, disclosures, retention and disposal of physician information are carried out in accordance with best privacy practices.

The full CAPER Privacy Policy is on the website: caper.ca.

How to Access the CAPER Data Tables

The CAPER statistics are available on the CAPER website www.caper.ca.

A hard copy of *CAPER Annual Census of Post-M.D. Trainees* is available upon request. Be sure to use the website to access the information you need. The *CAPER Annual Census of Post-M.D. Trainees*, the *CAPER Provincial Reports*, and the *CAPER Individual Specialty Tables* can be found at www.caper.ca. Individual tables for current and past years can be found at: <https://caper.ca/en/post-graduate-medical-education/data-tables/>

The CAPER database has been designed to serve as an information resource for physician workforce planning on a national and provincial or regional basis in Canada. Information is held in an individual longitudinal format to permit the study of the flow of trainees through the post-M.D. training system. Although information permitting the identification of individuals is not released from CAPER, group data tabulations and statistics will be prepared in response to requests.

Data requests made to CAPER are welcome. Request forms can be found at: <https://caper.ca/en/using-and-requesting-data/>

Definitions

The data provided to CAPER by all the Canadian Faculties of medicine contain the information on each trainee in accordance with the definitions below:

Faculty of Medicine Providing Post-M.D. Training

The faculty of medicine supervising the post-M.D. trainee on November 1 of the report year.

Field of Post-M.D. Training

The type of non-specialized training, family medicine training, or the specialty field in which a trainee is enrolled on November 1 of the report year. Several subspecialties have multiple entry points. For example, anaesthesiology, emergency medicine, internal medicine, pediatrics and general surgery all have critical care subspecialties. As individuals transition from primary to subspecialty training, CAPER counts them within the subspecialty field that is consistent with their prior training.

Clinician Investigator Program

This is a training program accredited by the Royal College for the purpose of providing additional research skills for physicians who are registered in one of the specialty or subspecialty training programs. Physicians reported in the A-5 table have already been included within their specialty training field in all other tables.

Rank

All new M.D. graduates now enter directly into either a family medicine or a specialty training program at the PGY-1 level.

Two years of training are required for certification in family medicine. The PGY-3 level training in family medicine is used for the accredited family medicine training programs such as care of the elderly and emergency medicine. To meet the training requirements of the Royal College a minimum of four to six years of training is required, depending on the specific specialty in which certification is sought.

A trainee progresses through the rank levels from PGY-1 to PGY-7 as appropriate for their specialty.

Fellows

CAPER uses the following definition of the term “fellow”: a post-M.D. trainee who is registered with the Postgraduate Medical Education Office of a university faculty of medicine and who, regardless of the source of funding, is pursuing clinical or research training which will NOT be evaluated by the supervising faculty for the purpose of Canadian licensure, or certification by the College of Family Physicians of Canada, the Collège des médecins du Québec or the Royal College of Physicians and Surgeons of Canada. (Trainees with appropriate prerequisite training registered in Royal College “accreditation without certification” programs are considered as residents, not fellows.)

Location of M.D. Degree

A trainee is classified as either a graduate of a Canadian medical school or as an international medical graduate if they completed their M.D. degree outside Canada (this includes U.S.A.).

Source of Funding

The source of funding is the organization or government agency providing the funding for the position occupied by the trainee. Two main categories are used: “Regular Ministry Funds” and “Other Funds”. “Regular Ministry Funds” refers to funds provided by the appropriate provincial government ministry responsible for the training of residents within that province. All other funding sources are grouped as “Other Funds” which includes such sources as ministry funds provided for complementary training by the Quebec Ministry of Health and Social Services, funds for residency training transferred from one province to another and government-funded foundations such as the Alberta Heritage Foundation. It also includes funding from federal government, foreign countries, clinical training sites, etc.

Age

Age is calculated as the age of the trainee on July 1 of the report year.

Legal Status

Three categories are used:

Canadian Citizen / Permanent Resident

Trainee is a citizen of Canada or has been accepted as a landed immigrant and has the right to live and work in Canada.

Visa

Trainee holds a visa permitting employment in Canada temporarily as a post-M.D. trainee.

First Year Trainees

Only first-time trainees in their first year of post-M.D. training in Canada at the PGY-1 level are designated as “first year trainees” and are included in Section G of the book. Other trainees at the PGY-1 level who are re-entering training, repeating the first year, or changing specialties requiring a second year at the PGY-1 level are NOT included in Section G on first year trainees.

Trainees included in the first year trainee category according to CAPER are:

1. Graduates of Canadian medical schools at the PGY-1 training level who have not been previously reported to CAPER.
2. International medical graduates who are entering training at the PGY-1 level in Canada for the first time (visa trainees beginning a program at the PGY-1 level are, therefore, included in this group).

Exiting Trainees

Postgraduate trainees exiting programs are categorized within the CAPER report in the following ways:

- 1) Trainees who have completed their training at a level consistent with certification by CFPC, Royal College or Collège des médecins du Québec and have not completed a training program in Canada before. This group is meant to represent physicians who will enter practice in Canada for the first time and is called the **practice entry cohort**. This cohort contains graduates of Canadian medical schools and international medical graduates who are Canadian citizens or permanent residents.

- 2) Trainees who have exited training before reaching a level consistent with certification.
- 3) International medical graduate trainees who held a temporary employment visa while in their last year of post-M.D. training. It is assumed most of these physicians will not enter practice in Canada.
- 4) Trainees who have re-entered training at some point and are exiting again.

Gender

Visa trainees have not been included in the data pertaining to gender. This was done to give a more realistic picture of the gender mix of the cohorts of physicians who will be entering practice in Canada. The tables which have been affected are A-3, G-5 and I-3.

Completion of Training

This term is used in Section J to indicate that the group exited training at a level appropriate for completion of training (e.g. PGY-2 or higher for Family medicine, PGY-4 or higher for most Royal College specialties and PGY-5 or higher for subspecialties and surgical specialties).

Palliative Medicine

Palliative medicine is a unique specialty in that it is accredited jointly by the Royal College of Physicians and Surgeons of Canada and by the College of Family Physicians of Canada. In this report, if they have Family medicine training background, they will be included under “Enhanced Skill: Other Fam. Med. Training”. If required, breakdowns of these enhanced skills can be provided by special request.

If the training route is a Royal College specialty, it will appear under Medical Specialties as “Palliative Medicine”.

This applies to data effective November 1, 2016 onward.

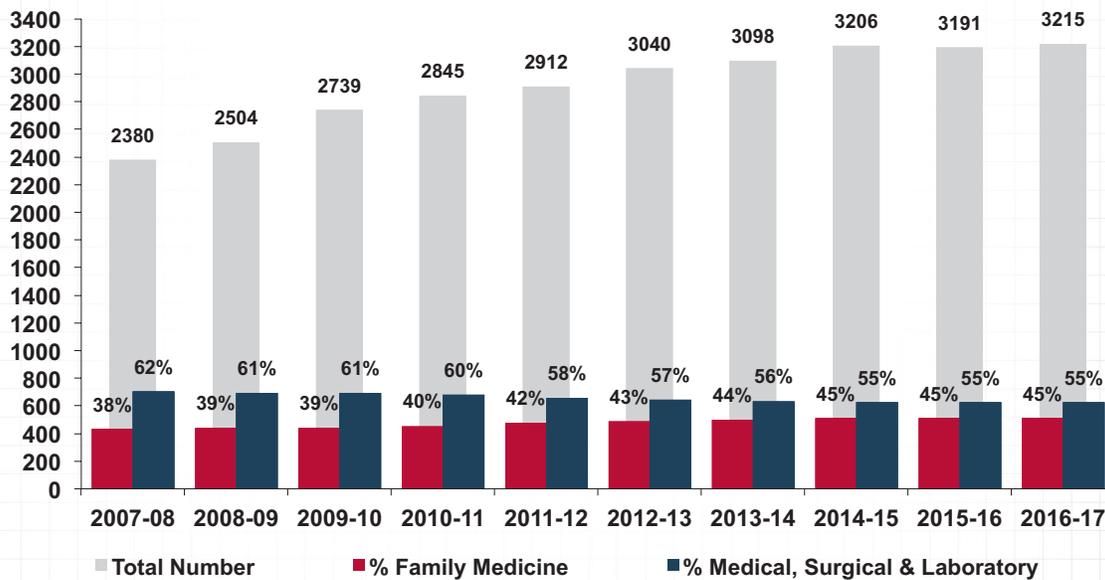

1. Quick Facts:

CANADIAN CITIZENS & PERMANENT RESIDENTS

This section presents summary statistics for post-M.D. trainees who are likely to be among Canada's future physician workforce, due to their citizenship status. Included in the results are graduates of Canadian faculties of medicine as well as international medical graduates (IMGs) who are **Canadian citizens or permanent residents**. Therefore this section excludes all visa trainees.

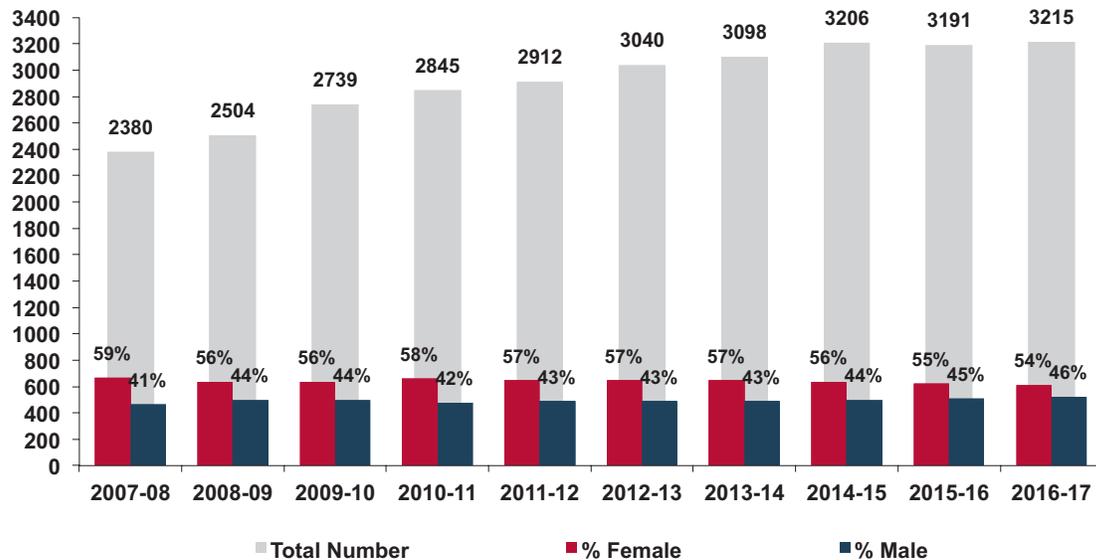

- A. **First year trainees:** From 2007-08 to 2014-15, the number of first year trainees increased by 35%. Since then it has levelled out to about 3,200. (Figures 1 and 4)
- B. **International Medical Graduates:** The proportion of first year trainees who are IMGs has decreased steadily since 2007-08 and the actual number of IMGs has fallen in the last three years. (Figure 3)
- C. **Gender:** The proportion of medical trainees who are women has increased in the past few decades. For the last decade the proportion of female first year trainees has gradually declined from 59% to 54%. In 2016-17, 62% of physicians exiting family medicine training programs were female and 44% of those exiting surgical programs were women. (Figures 2, 10 and 11)
- D. **Specialty mix:** In 2016-17, 1,452 (45%) of the first year trainees were in family medicine programs and 1763 (55%) were in medical, surgical and laboratory programs. Among exiting trainees in 2016, 42% were completing family medicine programs and 58% were completing medical, surgical and laboratory programs. (Figures 1 and 7)

1. FIRST YEAR TRAINEES in Family Medicine and Medical/Surgical/Laboratory training programs, Canadian citizens & permanent residents

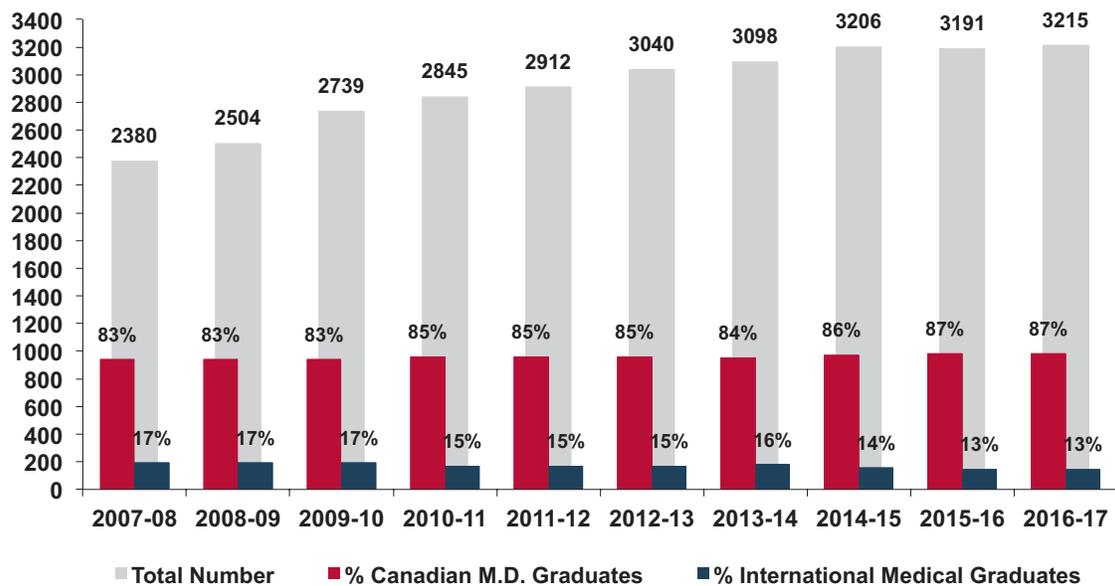

The total number of Canadian citizens/permanent residents entering training has plateaued to about 3200 per year.

2. FIRST YEAR TRAINEES by Gender, Canadian citizens & permanent residents

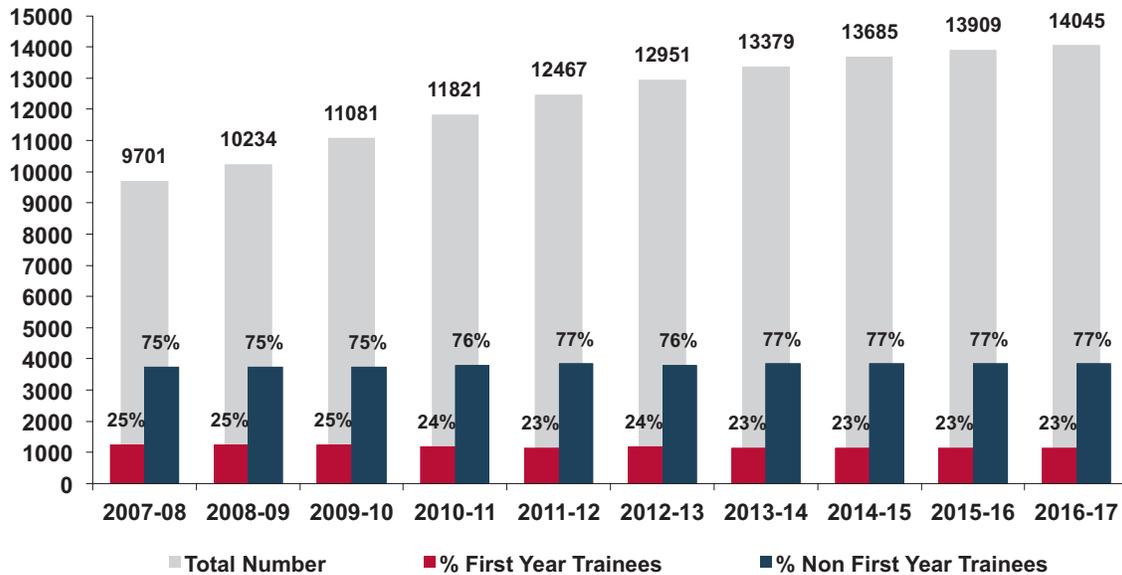

The proportion of female entering training gradually declined in the last decade from 59% to 54%.

3. FIRST YEAR TRAINEES by Place of M.D. Graduation, Canadian citizens & permanent residents

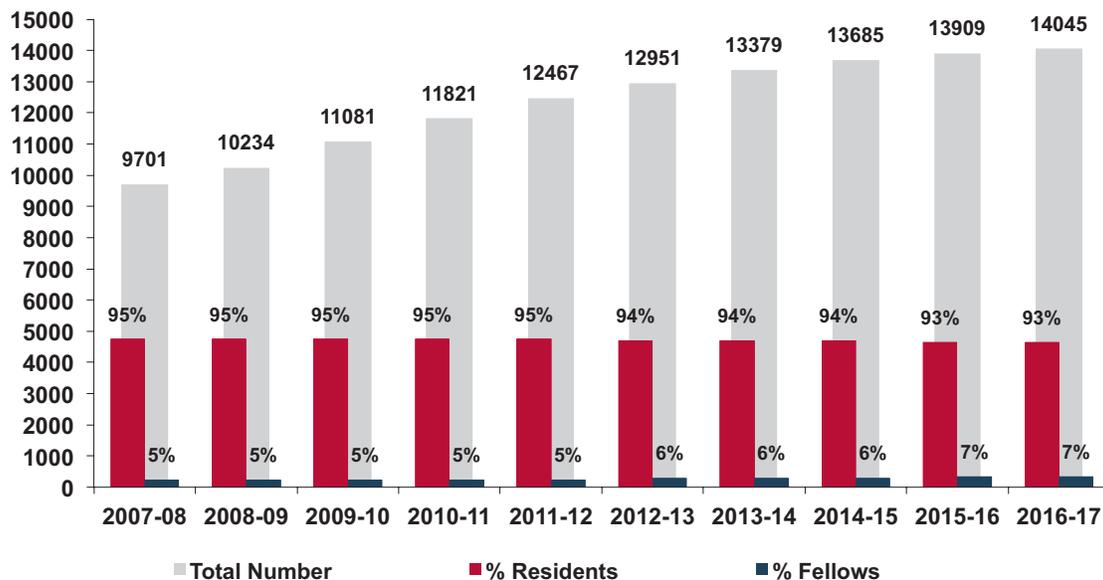

The proportion of Canadian medical graduates has gradually increased from 83% in 2007-08 to 87% in 2016-17 while the proportion of IMGs had decreased to from 17% to 13%.

4. FIRST YEAR TRAINEES and NON-FIRST YEAR TRAINEES, Canadian citizens & permanent residents

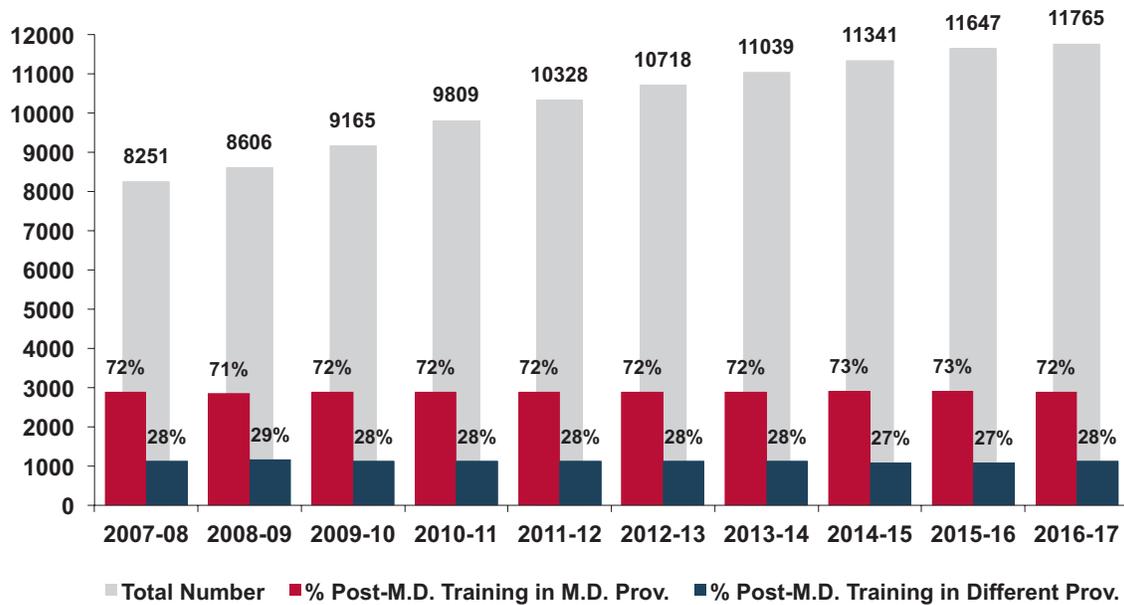

The total number of Canadian citizens/ permanent residents enrolled in post-M.D. training has increased by 45% since 2007-08. First year trainees continue to comprise about 23% of all post-M.D. trainees.

5. ALL RESIDENTS & FELLOWS, Canadian citizens & permanent residents

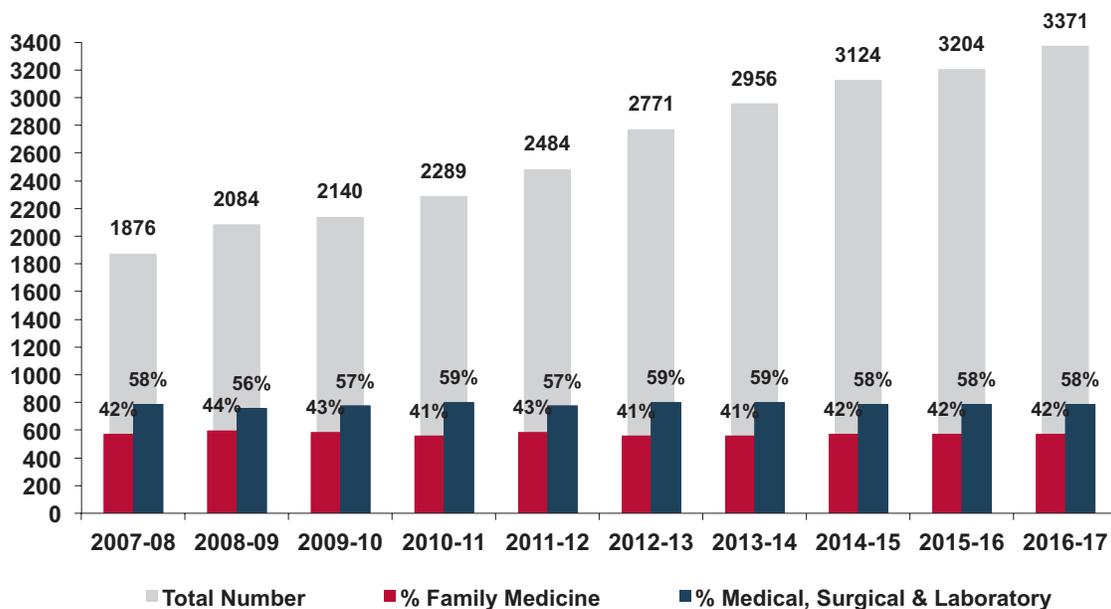

Fellows comprise about 7% of post-M.D. trainees in Canada and appears to be on the rise. While the percentages remain low, in absolute terms, this represents an increase of 459 fellows over the last 10 years.

6. LOCATION OF POSTGRADUATE TRAINING for Canadian Medical Graduates

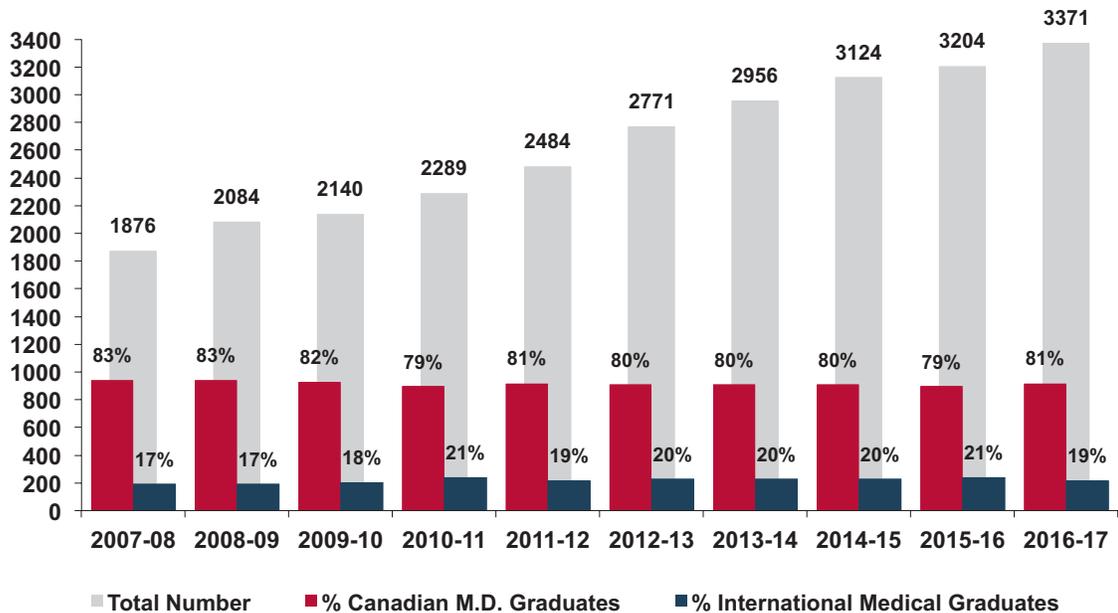

The proportion of Canadian graduates who do their post-M.D. training in the province where they earned their M.D. degree remains steady at 72% to 73%.

7. EXITING POST-M.D. TRAINEES - Family Medicine vs. Medical, Surgical Laboratory Programs, Canadian citizens & permanent residents

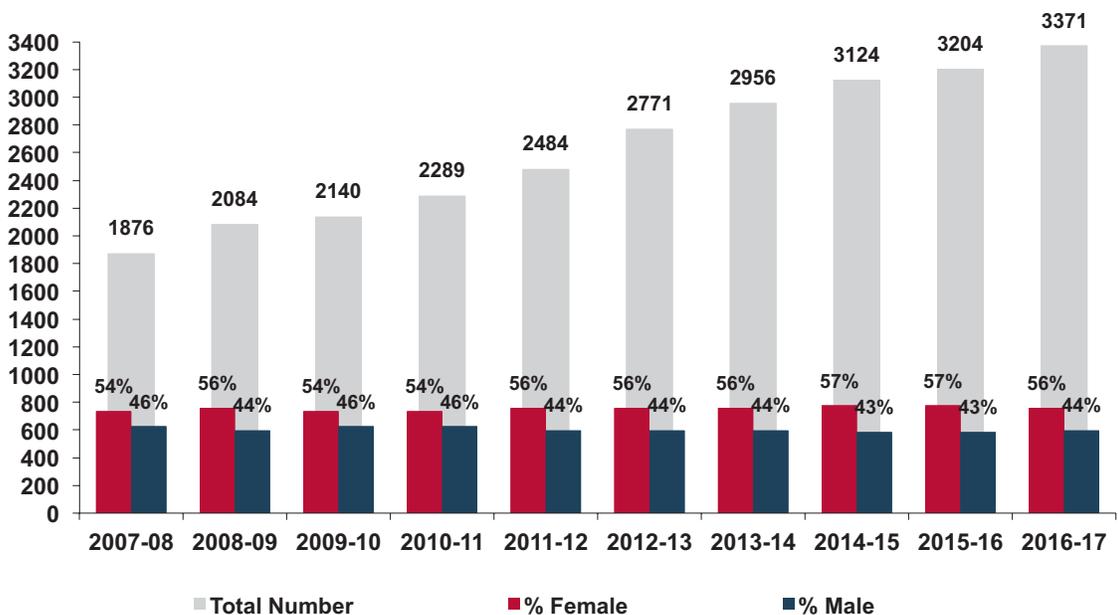

As the number of Canadian citizens/permanent residents entering post-M.D. training has increased, so too has the number of physicians exiting post-M.D. training. The number of physicians exiting post-M.D. training increased by 80% since 2007-08.

8. EXITING POST-M.D. TRAINEES by Place of M.D. Graduation, Canadian citizens & permanent residents

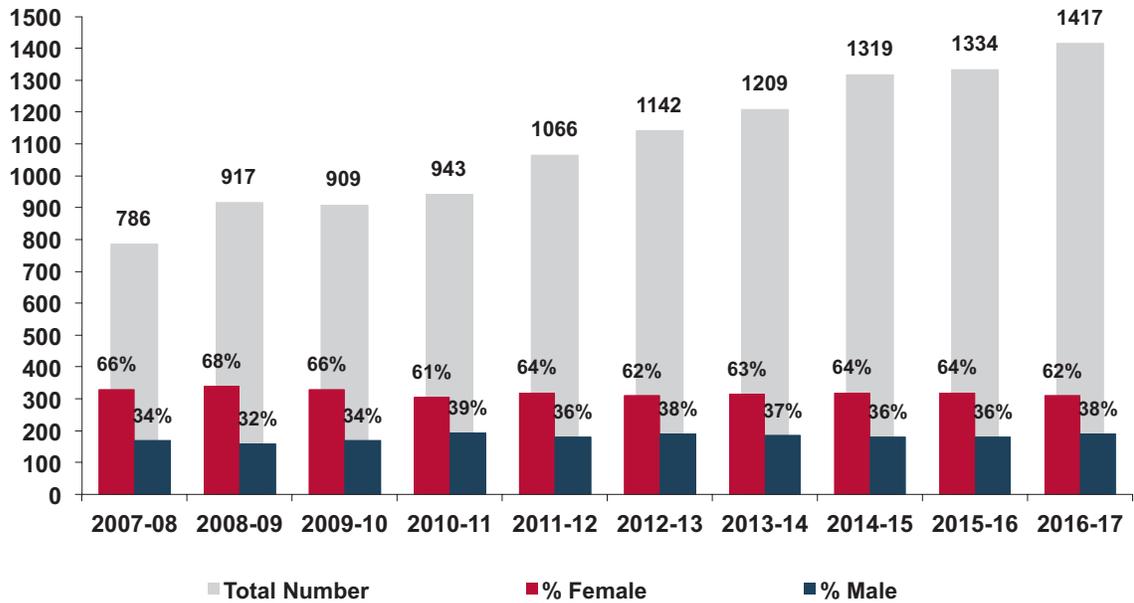

The proportion and actual number of international medical graduates exiting training increased steadily from 469 in 2011-12 to 674 in 2015-16 but dropped in 2016-17 to 631. The proportion of Canadian medical graduates in the exit group has remained at approximately 80% over the last six years.

9. EXITING POST-M.D. TRAINEES by Gender, Canadian citizens & permanent residents

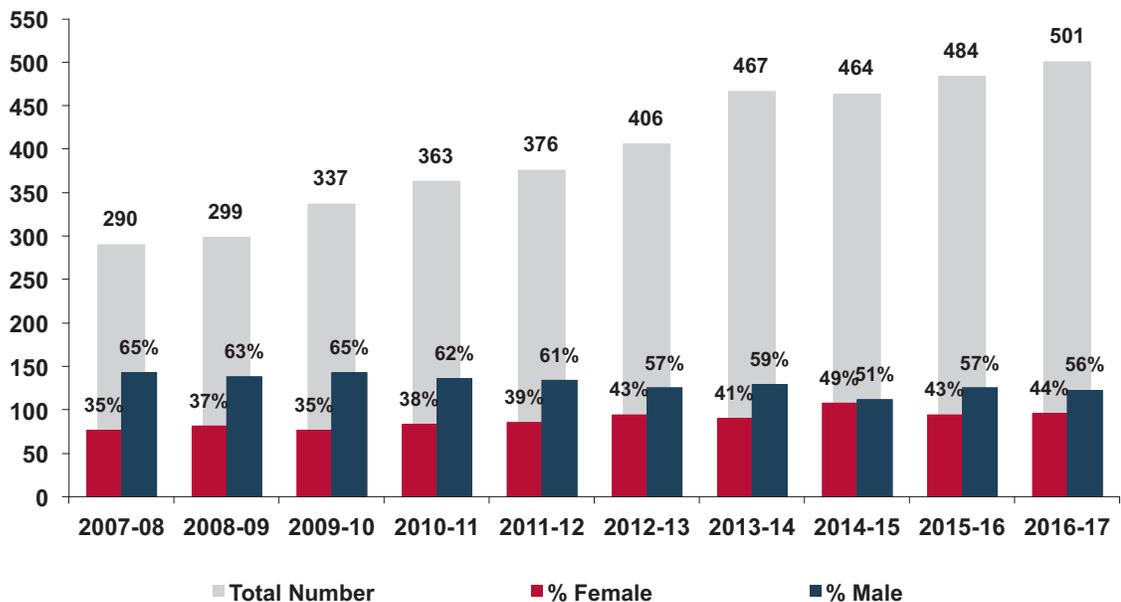

In the last five years, the proportion of female and male exiting trainees has remained about 56% and 44% respectively.

**10. EXITING POST-M.D. FAMILY MEDICINE TRAINEES,
Canadian citizens & permanent residents**

While there continues to be more female than male exiting family medicine training programs, the gap has narrowed from a 36 percentage point difference in 2008-09 to 24 percentage points in 2016-17.

**11. EXITING POST-M.D. SURGICAL TRAINEES by Gender,
Canadian citizens & permanent residents**

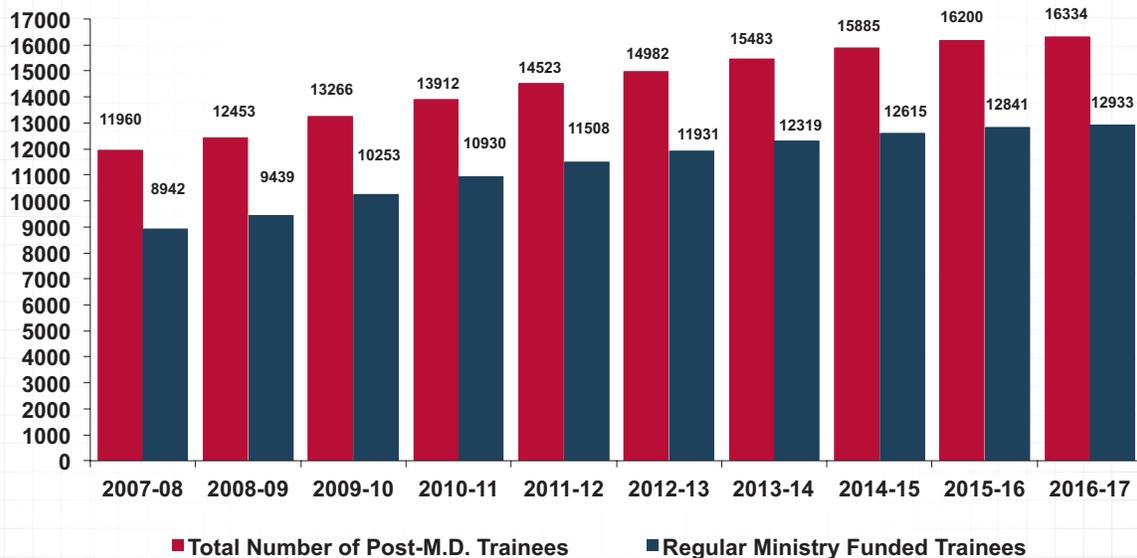

The proportion of female physicians completing surgical training increased from 35% in 2007-08 to 44% in 2016-17. 2014-15 appears to have been an exceptional year with 49%.

2. Quick Facts:

POST M.D. TRAINEES IN REGULAR MINISTRY FUNDED POSITIONS

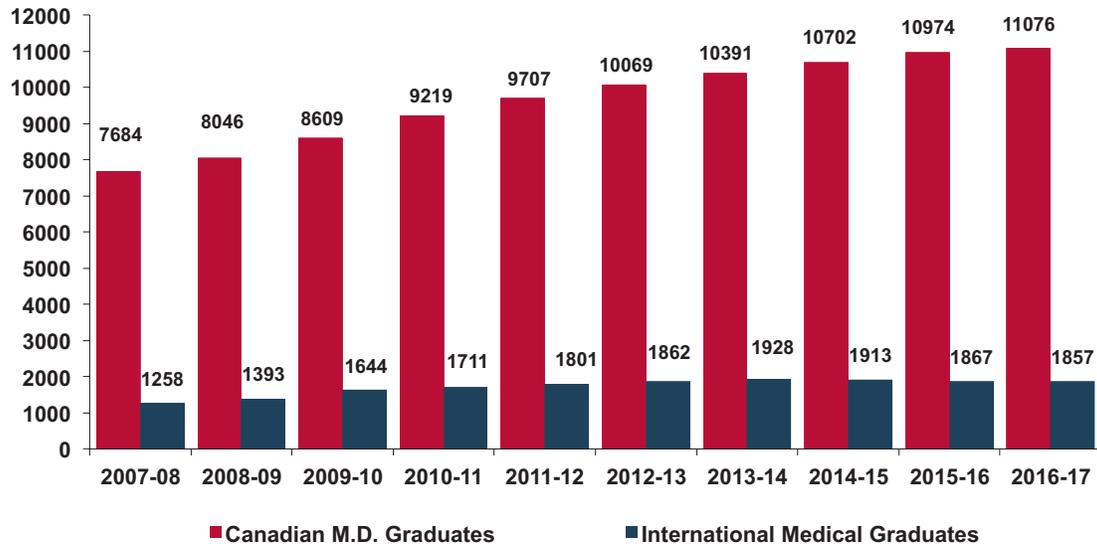

- A. The total number of regular ministry funded trainees continues to increase, reaching 12,933 in 2016-17. The total number of post-M.D. trainees (ministry and non-ministry funded) also continues to increase, reaching 16,334 in 2016-17. (Figure 1)
- B. Over the ten year period 2007-08 to 2016-17, the number of regular ministry funded Canadian medical graduates (CMGs) steadily increased from 7,684 to 11,076, a 44% increase. The number of regular ministry funded international medical graduates (IMGs) has decreased since 2013-14 but remains higher than a decade ago. (Figure 2)
- C. The number of current year CMGs in post-M.D. training increased steadily over the period 2007-08 to 2016-17 representing a 43% increase. (Figure 3)
- D. Throughout the period 2007-08 to 2016-17, the number of physicians re-entering post-M.D. training remained small but also the percentage it represented of all ministry funded trainees fell from 1.7% to 1.0%. (Figure 4)
- E. R-3 family medicine enrolment increased fairly steadily from 167 in 2007-08 to a high of 294 in 2016-17. The number of medical, surgical and laboratory trainees pursuing subspecialty training is 510 in both 2015-16 and 2016-17. (Figures 5 and 6)

1. TOTAL AND REGULAR MINISTRY FUNDED TRAINEES

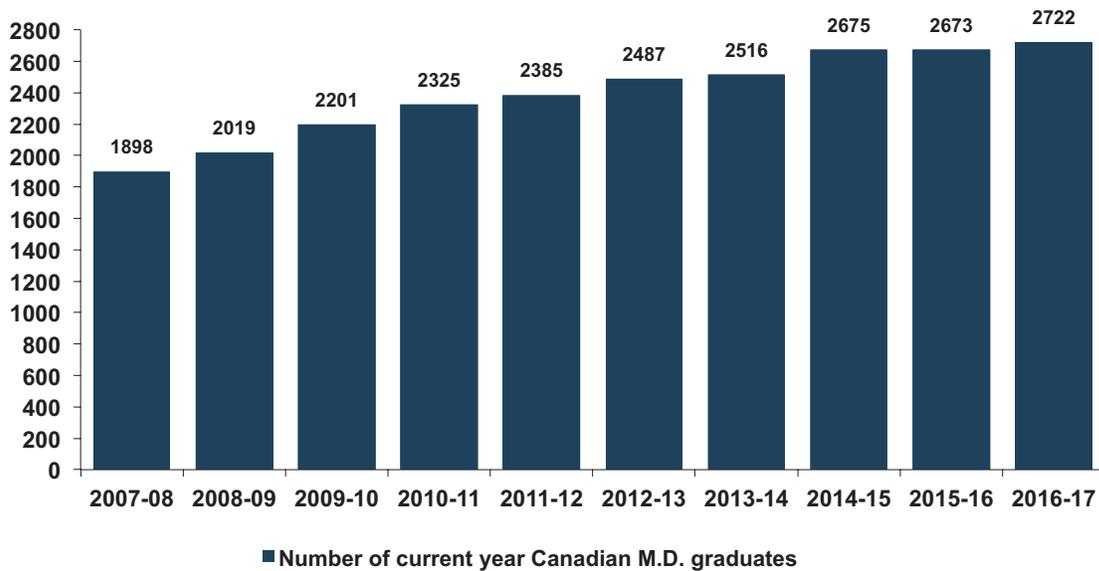

The total number of post-M.D. trainees increased by 37% since 2007-08. Regular ministry funded trainees increased at a slightly higher rate of 45%.

2. REGULAR MINISTRY FUNDED TRAINEES by location of MD degree

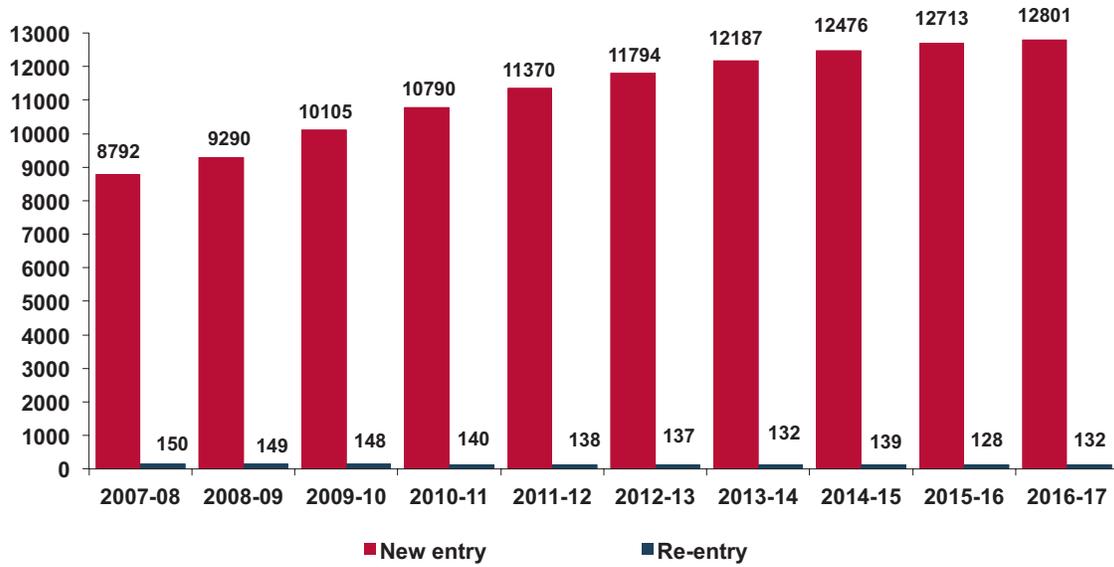

The number of regular ministry funded IMGs has decreased since 2013-14 but remains higher than a decade ago.

3. REGULAR MINISTRY FUNDED TRAINEES: Number of current year graduates of Canadian medical schools in post-M.D. training

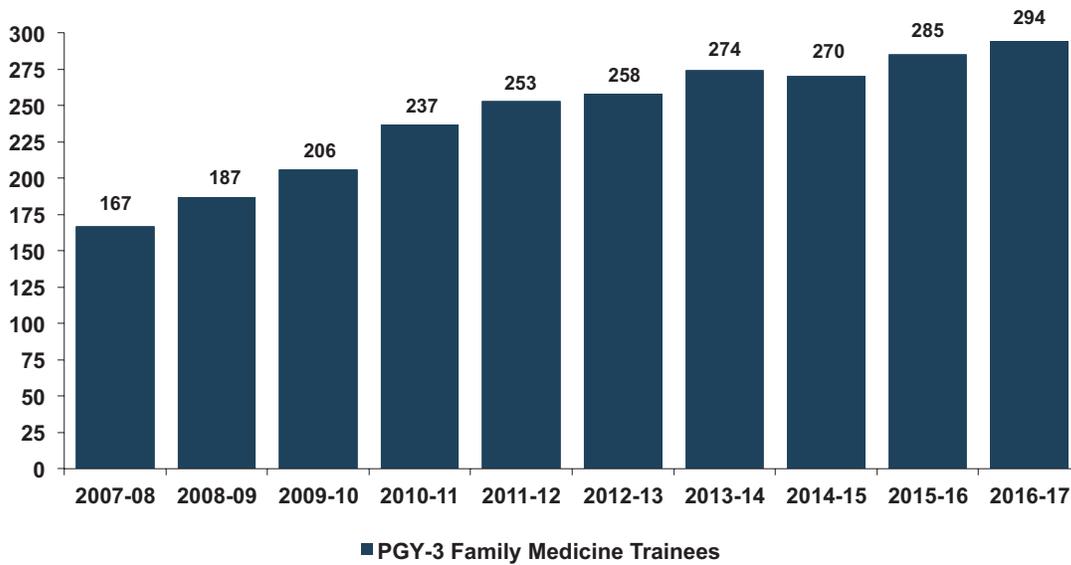

The number of current year Canadian M.D. graduates entering training in ministry funded positions increased to 2722 in 2016-17. This represents a 43% increase since 2007-08, when the number was 1898.

4. REGULAR MINISTRY FUNDED TRAINEES: Number of new entry and re-entry residents

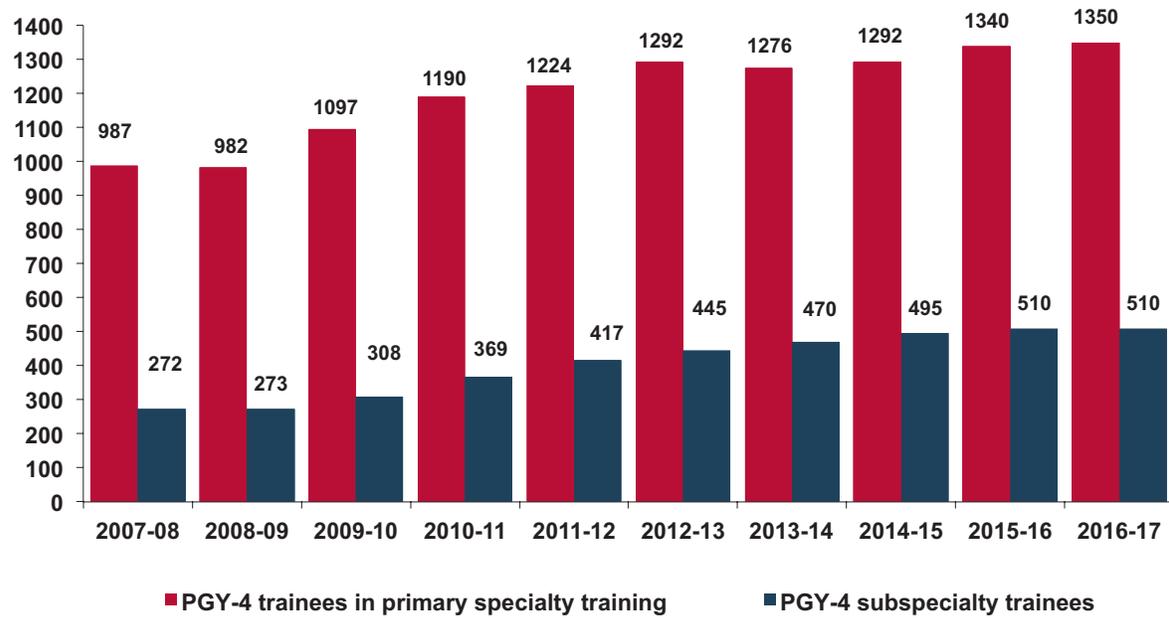

Ministry funded re-entry trainees has fallen from representing 1.7% of all ministry funded trainees in 2007-08 to 1.0% by 2016-17.

5. REGULAR MINISTRY FUNDED TRAINEES: Number of PGY-3 Level Trainees in Family Medicine

PGY-3 family medicine enrolment has increased fairly steadily to a high of 294 in 2016-17.

6. REGULAR MINISTRY FUNDED TRAINEES: Number of PGY-4 Medical, Surgical and Laboratory residents in primary specialties and subspecialties

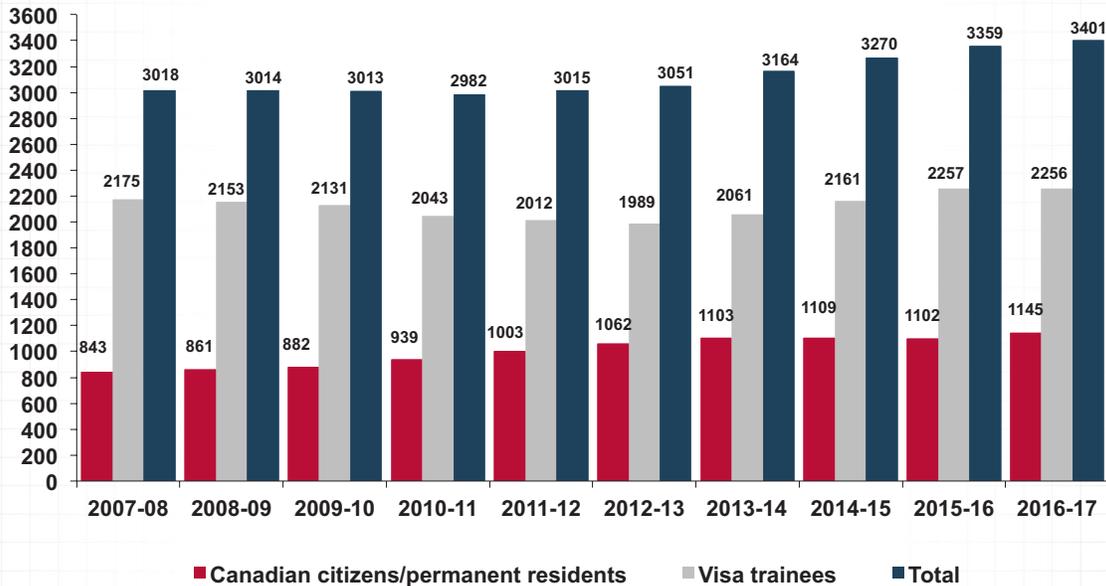

In 2016-17, PGY-4 level trainees in subspecialty training represented 27% of all ministry funded PGY-4 trainees compared to 22% in 2007-08.

3. Quick Facts:

NON-MINISTRY FUNDED POST-M.D. TRAINEES – Includes both visa trainees and Canadian citizens/permanent residents

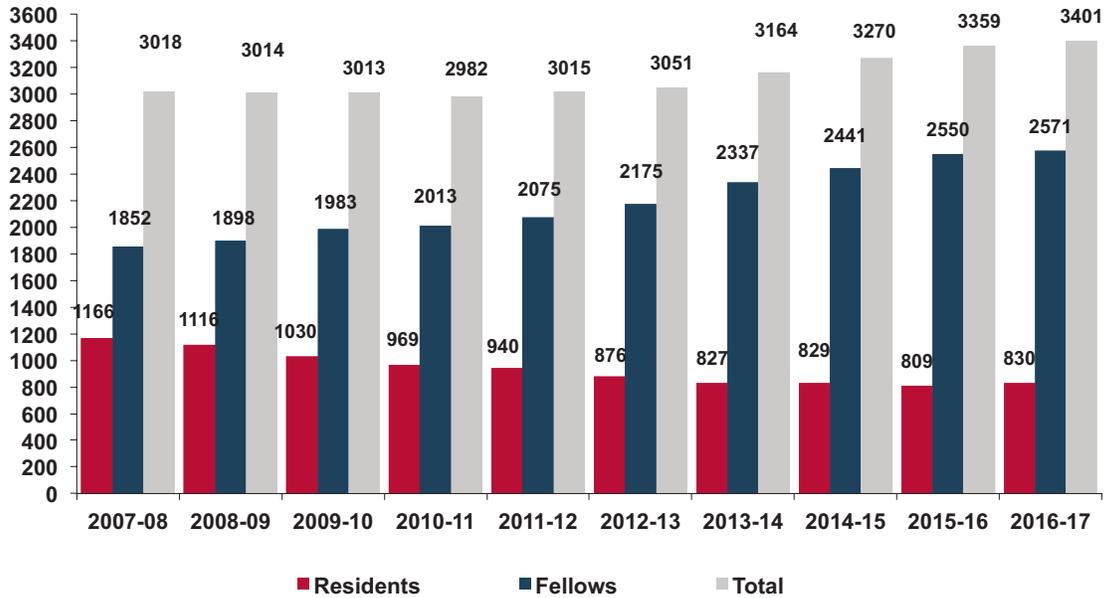

- A. The number of non-ministry funded post-M.D. trainees totaled 3,401 in 2016-17, an all-time high. The number of visa trainees funded this way reached 2,175 in 2007-08 before a decline to less than 2,000. The number has since risen to 2,256. (Figure 1)
- B. Fellows continue to comprise the largest portion of non-ministry funded trainees representing over 76% of all trainees in 2016-17, compared to less than a quarter who were residents. (Figure 2)
- C. Most non-ministry funded residents are international medical graduates (IMGs). In 2016-17, there were 650 non-ministry funded IMGs and 180 non-ministry funded Canadian medical graduates (CMGs). These figures do not include post-M.D. Fellows. (Figure 3)
- D. In 2016-17, there were 180 non-ministry funded CMG residents and 532 non-ministry funded CMG fellows. Fellows typically outnumber residents among non-ministry funded CMGs. (Figure 4)
- E. The number of non-ministry funded CMG re-entry trainees has gradually decreased from 40 in 2007-08 to a low of 11 in 2014-15. This number has increased since then to 20 in 2016/17. (Figure 5)

1. NON-MINISTRY FUNDED TRAINEES: Canadian citizens & permanent residents vs visa trainees

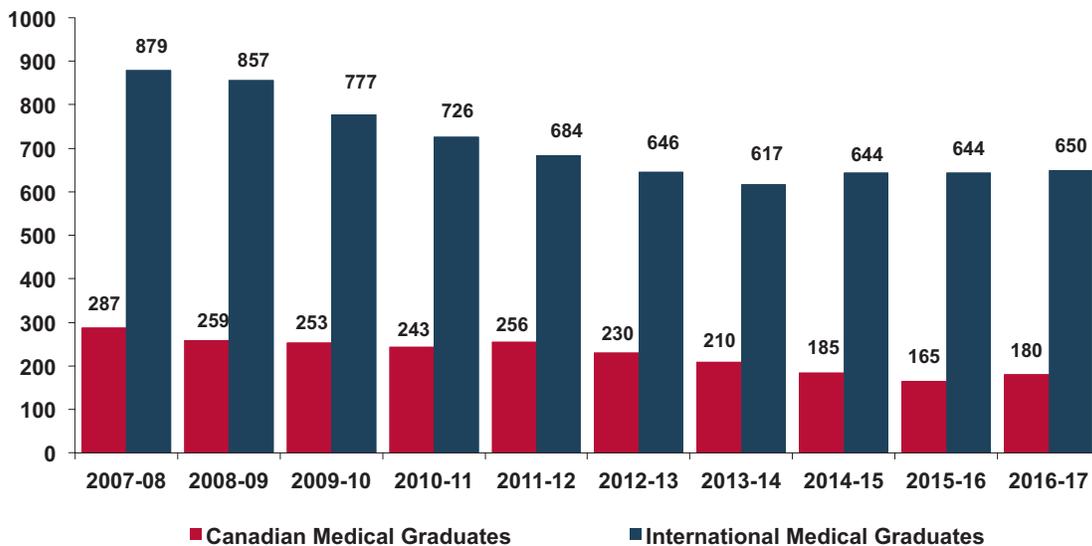

The total number of non-ministry funded trainees has increased by 13% during the past decade. Canadian citizens/permanent residents have seen a 36% increase over the same period.

2. NON-MINISTRY FUNDED TRAINEES: Residents vs Fellows

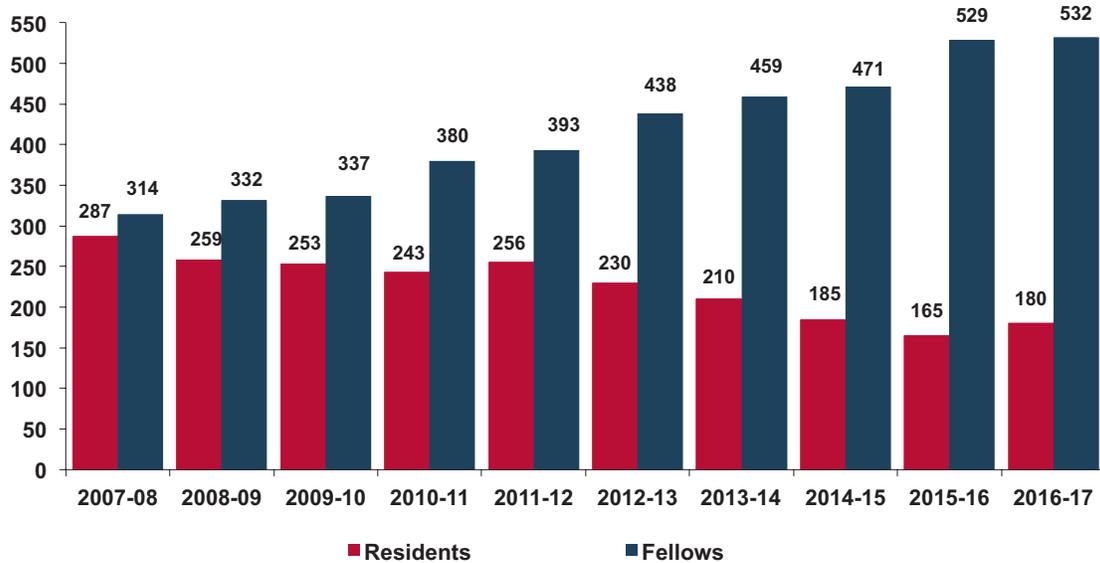

The number of non-ministry funded trainees increased from 3018 in 2007-08 to 3401 in 2016-17. This overall increase is attributable to a 39% increase in the number of non-ministry funded post-M.D. Fellows .

3. NON-MINISTRY FUNDED TRAINEES (excluding fellows) by place of MD graduation

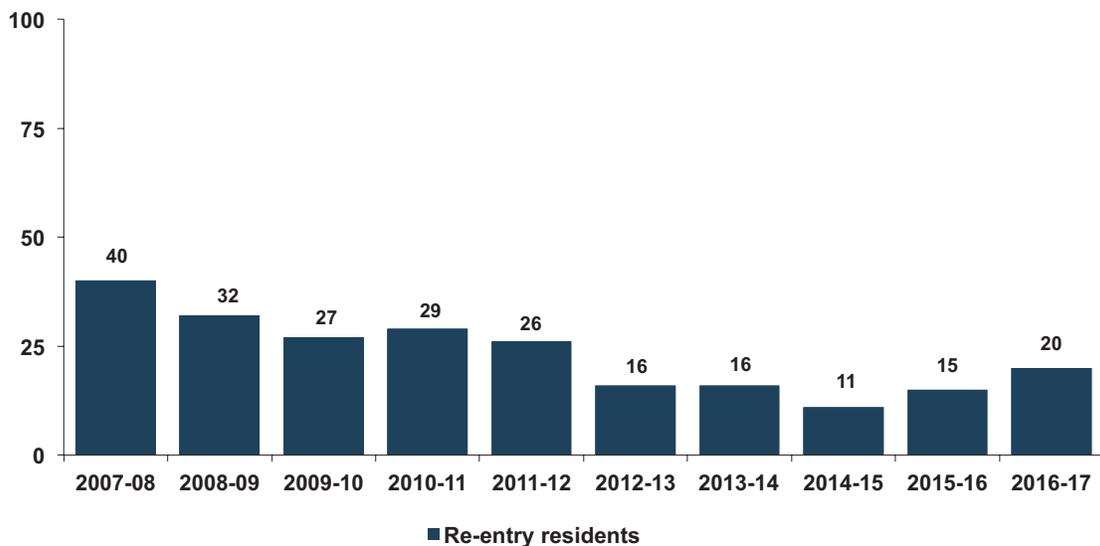

Between 2007-08 and 2013-14, there was a steady decline in non-ministry funded graduates of Canadian medical schools. Since then, there has been an increase of 5% bringing the numbers back to the level of 2012-13. Non-ministry funded IMG residents have declined from 287 in 2007-08 to 180 in 2016-17, a 37% decrease.

**4. NON-MINISTRY FUNDED TRAINEES – Canadian M.D. graduates only:
Residents vs Fellows**

With the decrease in non-ministry funded CMG residents and the increase in non-ministry funded CMG fellows, there are now almost three times as many fellows as residents.

**5. NON-MINISTRY FUNDED TRAINEES – Canadian M.D. graduates only:
Number of re-entry residents**

The number of non-ministry funded CMG re-entry trainees dropped from 40 in 2007-08 to a low of 11 in 2014-15. The numbers have since increased to 20.

Table J-4i

PRACTICE LOCATIONS

Five year practice locations for graduates of Canadian medical schools exiting training in 2011

Note: Each dot may represent more than one physician.

Supplementary Tables

Table K-1

SUPPLEMENTARY TABLES
Trainee switches by training field category

1. Changes between Family Medicine and Specialty training fields

	A. Changes From: Family Medicine To: Any Specialty	B. Changes From: Any Specialty To: Family Medicine
2011-2012	26	49
2012-2013	42	55
2013-2014	24	49
2014-2015	30	57
2015-2016	28	47

2. Changes between Specialty fields

	A. Changes From: Medical Specialties To: Surgical Specialties	B. Changes From: Surgical Specialties To: Medical Specialties
2011-2012	4	21
2012-2013	6	21
2013-2014	13	29
2014-2015	7	13
2015-2016	7	20

3. Total: Changes among training field groups

Year	Total
2011-2012	100
2012-2013	124
2013-2014	115
2014-2015	107
2015-2016	102

Note: Movement of trainees between any training field and Palliative medicine are not counted as changes. Although most program changes occur at the PGY-1 level, these tables include program changes at all training levels.
